

Data Sheet

HawkEye™ Remote Monitoring

HawkEye™ continually monitors your standby generators vital functions. Weekly HawkEye™ will automatically instruct your generator to run for 10 minutes. HawkEye™ will check the vital operating parameters such as voltage, frequency, oil and water temperature, battery condition,

emergency stop & fuel levels. After a test a condition report is automatically sent to the monitoring centre via a standard telephone line or GSM link. SMS messaging or voicemail reports can also be sent to nominated numbers.

Power Care
