Switchgear Services

Power Care

Service Features

- Visual Inspection
- Cleaning
- Lubrication
- Busbar Integrity
- Insulation Safety Inspections
- Full 'Current Injection' testing and calibration

Regular maintenance and servicing of Air Circuit Breakers (ACB) and LV Switchgear is essential for reliable and trouble free operation.

Our nationwide team of shentonggroup service engineers provide ongoing and scheduled maintenance through annual or one-off servicing of all makes and

sizes of ACB's and Low Voltage Switchgear.

Inspection, cleaning, lubrication, busbar integrity, insulation safety inspections together with full 'current injection' testing and calibration of ACB's are all part of our annual or one off scheduled service and inspection visits.
