

Data Sheet

Security Cage

shentonggroup have developed a practical and cost effective security package to prevent increasing vandalism and malicious damage. This package includes a strong steel mesh security cage. All steel work is galvanised and then polyester powder coated for longevity of life. The mesh is constructed from mild steel 6.0mm vertical wires sandwiched between 2no 8.0mm horizontal wires, with 200x50mm

apertures. The mesh is fitted to the framework with a 40x5mm mild steel clamp bar and M8 anti-tamper security fixings. A 1.2m single gate is included (wider or double gates are also available); with anti-lift hinges and a lockable slide bolt. There are two fixing options to choose from; the cage can either be dug in or bolted down.

LENGTH	WIDTH	2.0m HIGH		2.4m HIGH	
		DIG IN	BOLT DOWN	DIG IN	BOLT DOWN
2.5—5.0m	3.0m	SCD100	SCB200	SCD300	SCB400
5.0—7.5m	3.0m	SCD101	SCB201	SCD301	SCB401
2.5—5.0m	4.0m	SCD102	SCB202	SCD302	SCB402
5.0—7.5m	4.0m	SCD103	SCB203	SCD303	SCB403
2.5—5.0m	4.8m	SCD104	SCB204	SCD304	SCB404
5.0—7.5m	4.8m	SCD105	SCB205	SCD305	SCB405

Power Systems

Standard Features

- 1.2m wide single gate
- All standard RAL colours available
- Powder Coated
- RHS mild steel framework
- Gate fitted with anti-lift hinges and lockable slide bolt
- Two fixing options
- Mesh fitted with anti-tamper security fixings
