

shentongroup Vacancy

Job Title: Generator and CHP Project Manager

Location: Andover, Hampshire

This is an opportunity to join a thriving Generator, UPS Systems, Switchgear and CHP (Combined Heat and Power) business, in an industry with a substantial future. The successful candidate is likely to be an experienced but energetic person. A mature outlook is needed with the ability to work under pressure and within tight timeframes. A practical, mechanical and electrical background will be essential, along with a willingness to learn, as there will be a cross section of projects to run. Full training and backup support will be given to make a successful post. The candidate will be required to work out of our head office in Andover, Hampshire and will need to travel in daily.

Your position would be within the Projects department, reporting to the Operations Manager, but also working alongside the Sales department.

About shentongroup

The UK's Leading Technical Experts in Standby Power, Uninterruptible Power Supplies and Combined Heat and Power Systems.

A thriving business, with 36 years in the standby power and energy efficiency markets, shentongroup supply, install, hire and maintain critical power systems and associated equipment, such as generators, UPS systems, switchgear and CHP (Combined Heat and Power). We have a strong family management structure, and high standards of performance and ethics. We have a mature financial position. We trade from multiple locations around the UK, and you would be part of a team of circa 70 staff.

We have robust staff development policies, and offer substantial opportunities for stable long term employment.

Main purpose of role

You will need organisational and IT skills to take responsibility for a project from receipt of order stage, through delivery, installation and finally commissioning. This is mainly an office based management role (can also be field based at times) where you will be expected to:-

- a) Attend hand-over meeting with the sales department to take ownership of the project
- b) Liaise with our supply chain for ordering components and coordinating sub-contractors
- c) Organise and attend client site technical meetings
- d) Coordinate delivery and installation logistics
- e) Oversee commissioning and make sure the project is complete

What We Are Looking For

Personal Skills

- a) Positive mental attitude
- b) Self-motivated, and trustworthy to work effectively with minimal supervision
- c) Good interpersonal skills
- d) Good verbal and written presentation skills
- e) Happy with high mileage driving, and working away from home
- f) High standards of cleanliness and personal presentation. Able to conduct yourself in director level meetings in a boardroom environment.
- g) Ability to think on your feet, and function effectively in a fast moving business.

Experience and Qualifications

Essential:

- a) Minimum of 5 years relevant experience as an engineer in the industry, or similar role.
- b) Strong practical knowledge of CHP/generator systems
- c) Strong practical electrical engineering knowledge of LV power generation and distribution systems.
- d) Practical knowledge of high level software based control systems such as Comap / Deep Sea etc.
- e) IT skills, fluent with Outlook, Excel, and Word. Practical experience of using laptop based bespoke engine system analysis and control programmes such as Comap PC Suite / DSE Configuration Suite etc.

Desirable:

- a) IT/Broadband Network knowledge
- b) Gas Safe qualification
- c) CAD experience or practical skill
- d) Mechanical or Electrical Engineering qualification
- e) IEE 17th or 18th Edition Qualified
- f) CSCS card
- g) Experience with building services plant (both electrical and mechanical)
- h) Knowledge of BMS protocol languages such as Modbus / Profibus / BACNet etc

Your Package

- Attractive salary
- Fully flexible working hours are required, especially given the travelling that may be needed
- Company Vehicle
- Company Phone
- 25 days annual leave, increasing through company loyalty programme
