

# Shenton Group Vacancy

**Job Title:** Generator Project Manager

**Location:** Nationwide

As part of our continued growth Shenton Group require a **Generator Project Manager** to join our dynamic and expanding team. A practical and mechanical background will be essential, along with a willingness to learn, as there will be a cross section of projects to manage. Full training and backup support will be given to make a successful post. The candidate will ideally be located near our head office in Andover, Hampshire but other locations will be considered.

Your position would be within the Projects department, reporting to the Operations Manager, but also working alongside the sales department and the technical department.

## About Shenton Group

The UK's leading Technical Experts in Standby Power, Uninterruptible Power Supplies and Combined Heat and Power Systems.

A thriving business, with 37 years in the standby power and energy efficiency markets, Shenton Group supply, install, hire and maintain critical power systems and associated equipment, such as generators, UPS systems, switchgear and CHP (Combined Heat and Power). We have a strong family management structure, and high standards of performance and ethics. We have a mature financial position. We trade from multiple locations around the UK, and you would be part of a team of circa 80 staff.

We have robust staff development policies, and offer substantial opportunities for stable long term employment.

## Main purpose of role

You will need organisational and IT skills to take responsibility for a project from receipt of order stage, through delivery, installation and finally commissioning. This is mainly an office based management role (can also be field based at times) where you will be expected to:-

- a) Attend hand-over meeting with the sales department to take ownership of the project
- b) Liaise with our supply chain for ordering components and coordinating sub-contractors
- c) Organise and attend client site technical meetings
- d) Coordinate delivery and installation logistics
- e) Oversee commissioning and make sure the project is complete

## **What We Are Looking For**

### **Personal Skills**

- a) Positive mental attitude
- b) Having the right to live and work in the UK
- c) Self-motivated, and trustworthy to work effectively with minimal supervision
- d) Good interpersonal skills
- e) Good verbal and written presentation skills
- f) Happy with high mileage driving, and working away from home
- g) Ability to think on your feet, and function effectively in a fast moving business.

### **Experience and Qualifications**

#### **Essential:**

- a) Minimum of 3 years relevant experience as an engineer in the industry, or similar role.
- b) Previous relevant experience with Generators and UPS systems.
- c) Strong practical knowledge fuel systems and acoustic noise ratings.
- d) Practical knowledge of high level software based control systems such as Comap / Deep Sea etc.
- e) IT skills, fluent with Outlook, Excel, and Word. Practical experience of using laptop based bespoke engine system analysis and control programmes such as Comap PC Suite / DSE Configuration Suite etc.

#### **Desirable:**

- a) Project Management Qualification
- b) Good Electrical and Mechanical controls knowledge
- c) Strong practical electrical engineering knowledge of LV power generation and distribution systems.
- d) CAD Qualification or practical skill
- e) Mechanical or Electrical Engineering qualification
- f) IEE 18<sup>th</sup> Edition Qualified
- g) CSCS card
- h) Experience with building services plant (both electrical and mechanical)

### **Your Package**

- Attractive salary
- Excellent staff benefits
- Fully flexible working hours are required, especially given the travelling that may be needed
- Company Vehicle
- Laptop
- Company Phone/Phone allowance
- 25 days annual leave, increasing through company loyalty programme
