

Shenton Group Vacancy

Job Title: Senior Service Engineer

Location: South

We are continuing to expand and require a further high calibre Senior Service Engineer to join our engineering team. Strong Mechanical/Electrical background is essential, with a willingness to learn. Full training and backup support will be given to make a successful post. The candidate would ideally be located in the south of the UK and will report to Generator Operations Manager.

About Shenton Group

A thriving business, with 37 years in the standby power and energy efficiency markets. We have a strong family management structure, and high standards of performance and ethics. We have a mature financial position. We trade from multiple locations around the UK, and you would be part of a team of circa 80 staff.

We have robust staff development policies, and offer substantial opportunities for stable long term employment.

The main area of responsibility is:

You will be responsible for all equipment testing ensuring it functions as per company regulations. To achieve this, you need to possess a thorough understanding of manufacturing and product use, as well as of customer expectations. Traveling and overnight stays are regular features of the job. This role will include:

- Attending site as principal engineer
- Completing Controller/Panel Upgrades
- Fault Finding on a large variety of engines, controllers and models of generators
- Technical Support to Office Team, Workshop and Service Engineers
- Support/Training of Service Engineers
- Completing Site Surveys
- Support to Small Works Project Manager
- Managing and Completing works for Small Works Projects on Site
- Compiling RAMS
- Commissioning
