**Job Description**

Shenton Group are increasing the size of their UPS maintenance department and the successful candidate will be an experienced but energetic person with time served on his tools.

You will be travelling all-round the UK using your engineering skills to carry out routine servicing work, fault finding, and remedial works (capacitor, fan and battery replacements) on a range of UPS Systems in the range of 5kVA – 1MVA. This will be a mixture of scheduled service work and reactive callout work where you would be the first responder to a breakdown on site.

A callout rota is also in operation, which involves you being on call out of hours.

## Skills Required

### Personal Skills

- Positive mental attitude
- Having the right to live and work in the UK
- Self-motivated, and trustworthy to work effectively as a remote based person with minimal supervision
- Good interpersonal skills
- Good verbal and written presentation skills
