24/7/365 Support

Fast Response

National Coverage

Turn-key Solutions

“Shenton are a very competent and focused company who deliver to a high standard. Our experience over a 2 year period of highly intensive and complex re-working of this site with Shenton was extremely positive, evidenced by the successful delivery of this project.”

# Generator Hire Packages For Planned Outages & Emergencies

Supporting sectors such as Utilities, Healthcare and Distribution Centres, 24/7 nationwide. Generators range from 30kVA to 1250kVA and are able to synchronise for larger power requirements.

Our turn-key packages include site survey, design, delivery, setup, commissioning, ongoing maintenance and refuelling. Whether you need something specific or are unsure about your requirements, get in touch, and our technical experts will be able to help you every step of the way!

## LONG OR SHORT TERM HIRE

Whether you need to hire a generator for a couple of hours or a couple of years, we have you covered. Our power experts will tailor your generator hire package to ensure that you have everything that you need, providing true value for money.

## PROJECT MANAGEMENT

From carrying out an initial site survey, right through delivery, install and monitoring, we will look after your complete rental project.

## CONNECTIONS

All of our rental generators come with a range of connections and adapters, to provide ease when connecting.

- Single phase
- 3 phase
- 3 phase and buzz bars
- Buzz bars

## HAVE AN ON-SITE EXPERT

For critical applications or shut-downs, Shenton Group offer the complete 'Baby Sitting' service for your rental generator. Have an engineer on site for the duration of the hire to ensure help is on hand.

## REMOTE MONITORING

Remote monitoring ensures that your generator is running as it should be, monitored by our specialists. The real benefit is that it enables us to predict and rectify issues before they occur keeping your power up and running with minimal disruption - if any at all!

## FUEL MANAGEMENT

Whether your rental generator is installed as a backup in case of a mains failure, for an event or to power machinery, be sure that you have considered fuel management. Shenton Group can provide fuel level monitoring to ensure that your fuel is replenished and power continuity maintained.

## NOISE RATINGS

Noise ratings between generators vary, if there is a specific noise requirement that you need to meet, get in touch and we will organise a solution to match.

## CABLE MANAGEMENT AND DISTRIBUTION

All cables and necessary distribution is included in your package. Using our own equipment our team can either just deliver or carry out the full installation ensuring everything is left neat and tidy.

## ACCESSORIES

Our experienced team members will be able to advise on any additional accessories or equipment that you may need for the duration of the hire. This could include:

- Fuel tanks
- AMF panels
- Transformers
- Cabling
- Distribution panels
- Temporary fencings
- Cable covers and ramps
- Acoustic Panels

## WHY CHOOSE US?

- 24/7/365 technical and call-out support
- Complete project management
- Fast response
- Nationwide coverage
- Long or short term contracts
- Free site surveys
- Fully managed service
- Turn-key packages include electrical distribution, fuel tanks and accessories
- Largest fleet of road tow generators ensuring maximum flexibility
- Managed re-fuelling service for long term contracts
- 40+ years experience

"Just to say many thanks for your prompt service and good response to call-outs yet again; it has proved fast, reliable and very good value for money. Well done!"  
**Leading Healthcare Organisation**

# CASE STUDIES

## Providing Critical Backup Power Solution for Laboratory Expansion

### PROJECT OVERVIEW

With the expansion of the Science Park, the need for a reliable backup power solution became paramount. With an established relationship with governmental bodies such as the local council and DSTL (the Ministry of Defence's Science Technology Laboratory), Shenton Group was once again approached to provide a critical backup power solution to support the first of three buildings in the expansion project.

### SOLUTION

A 500kVA generator was installed on a long-term hire agreement since 2021 to support the new laboratories. Shenton Group provided a tailored solution, a 500kVA standby rental generator with customised panels and cables, ensuring seamless

backup power. Additionally, 24/7 remote monitoring was included in the contract ensuring proactive management and swift issue resolution.

### OUTCOME

Building 1 of the laboratory expansion has enjoyed reliable backup power for over three years. Shenton Group continues to ensure power continuity and safety, remaining a trusted partner in critical backup power solutions.

## Seamless Power Solution for Amazon

### PROJECT OVERVIEW

Amazon Direct is one of the largest distributors in the UK with over 30 warehouses operating currently. In 2021 an unplanned service requirement arose in one of Amazon's distribution centres, which resulted in the requirement for alternative power.

### SOLUTION

The project required three 1250kVA generators, complete with bulk fuel tanks and cabling. Shenton Group engineers carried out the full installation of the generators and the client was kept updated in regards to progress by our dedicated Operations Team. Once installed Shenton Group also provided ongoing 'baby sitting' for the duration of the hire to ensure any potential issues could be resolved quickly and give the client further peace of mind. As the generators were running as prime power it was

critical that fuel levels were managed. Shenton Group installed a remote fuel management system to ensure the tanks were refuelled when required. Once the client's works had been completed Shenton Group de-installed the generators leaving yet another very satisfied customer

### OUTCOME

Shenton Group delivered 3750kVA of uninterrupted power in a fully managed, tailored package, ensuring complete peace of mind for the client.

## Reliable Power for Global Biopharmaceutical Distribution Centres

### PROJECT OVERVIEW

A global biopharmaceutical company, based in the north west of the UK, was expanding due to the increase in demand for pharmaceutical supplies during the COVID-19 pandemic. Further manufacturing and cold storage were required on-site, and temporary power was needed for this expansion.

### SOLUTION

To support temporary refrigeration needs, Shenton Group supplied two 100kVA generators in an N+1 configuration, bulk 3000 litre fuel tank, cable, and fuel management. In this setup, one generator providing prime power is synchronised with another backup generator to ensure in the rare case of component failure, there is a backup generator that automatically activates and reinstates the power supply within minutes.

### OUTCOME

This solution offered added resilience and peace of mind for the client, especially as this was a long-term generator hire which spanned 7 months, from November 2022 to June 2023, a time that the medical industries across the globe were pushed to the limits and pharmaceutical supplies in high demand.

# Trusted power solutions for over 40 years. Speak to the UK's leading technical experts

## We are here to support you

Since 1982, we have been providing trusted power solutions to public and private organisations supporting the likes of the NHS, Virgin Media, Amazon, and the Royal Air force, specialising in supplying, installing, maintaining, and leasing power Generators.

Our extensive technical knowledge and experience are unparalleled, ensuring that you receive the right solution for your needs. But what truly sets us apart is our commitment to delivering peace of mind through seamless turn-key solutions.

Whether you need a permanent generator installation or temporary generator hire, rest assured, it's just the tip of the iceberg when it comes to the comprehensive and dependable power solutions we offer...

### GENERATORS & UPS

Permanent installations of generators and UPS systems, from design to commissioning

- Design, manufacture, project-management and integration
- HV & LV generators, 30kVA to 3200kVA, and UPS systems up to 500kVA
- Industry-leading choice of engines, alternators, control systems and UPS's

### COMBINED HEAT & POWER

CHP maintenance contracts ensuring optimal run time, saving you money on energy costs. Any make/ model of CHP

- Dedicated engineers available 24/7/365
- Tailored contracts that can include full renovation, remedial and upgrade works
- Remote monitoring

### GENERATOR RENTAL

Short and long term generator hire for planned outages and emergency response

- Fast response and 24/7/365 support
- Standby or prime power, 30kVA to 1250kVA and are able to synchronise for larger power requirements
- Cables, accessories and refuelling included

### POWER CALL

Generator call out services for prolonged power outages, typically part of a power continuity plan

- 24/7/365 nationwide emergency call-out generator service
- Guaranteed response within 4 hours
- Cost savings – an alternative solution to having an on-site generator

### MAINTENANCE & MONITORING

Tailored maintenance contracts for any make and model of Generator, UPS, ensuring reliability

- Full renovation, remedial and upgrade works
- 24/7/365 engineer support and remote monitoring
- Extended warranty, compliance and regulation support

# Supporting the Nation with reliable power solutions

Our clients are at the heart of everything we do.  
We have the privilege of supporting clients such as:

“In the period I have been working with Shenton on our customer contracts, I have found them to be professional and flexible in all our dealings and their performance has met our companies needs by providing a high quality and reliable service. This has proven invaluable to us given the evolving needs of the Telecom services industry and, as an approved preferred supplier in our supply chain, we anticipate that we will continue to engage Shenton for the foreseeable future.”

Procurement Manager - Facilities Management Company

“I have been using Shenton for over 5 years now, they were brought on board to initially diagnose a small fault at our data centre in South London, and now they supply, install, service and load bank our entire generator estate.

Their knowledge in the backup power space is second to none and despite growing rapidly, they still maintain the family-business feel and quality. The back-office staff are professional, their project managers are diligent and their management team are super responsive.

I genuinely can't recommend them enough and I'm happy to be contacted for verbal references. Keep up the good work!”

Managing Director - Data Centre
